OBJECTIVES AND INVESTMENT POLICY

Objectives:

The objective of ARIA Global Equity Absolute Return Fund is capital appreciation while controlling risk. The Sub-Fund aims to achieve its investment objective by investing primarily in a portfolio of individual stock market indices and sectors globally by pursuing the strategy detailed below. It is not proposed to concentrate investments in any one geographical region or sector.

The Sub-Fund will be structured as a long/short portfolio. A universe of major market indices and global equity sectors, will be assessed, and long positions taken in those positions determined most likely to deliver a positive return, and short positions taken in the positions determined most likely to deliver a negative return.

Investment Policy:

The Investment Manager seeks to exploit market movements by employing quantitative research, based on fundamental investment insights and objective evidence, to identify "return factors" that predict stock price movements. The investment process focuses equally on risk and return and aims to generate a portfolio with favourable risk return characteristics, selecting long and short positions (through the use of derivatives where appropriate or required) from major global equity markets and sectors. Stock selection focuses primarily on liquid markets and sectors.

RISK AND REWARD PROFILE

This indicator shows how much a Sub-Fund may have risen and fallen in the past and therefore how much a Sub-Fund's returns may have varied. It is a measure of a Sub-Fund's volatility. The higher a Sub-Fund's past volatility, the higher the number on the scale and the greater the risk that investors in this Sub-Fund may have made losses as well as gains. The lowest number on the scale does not mean the Sub-Fund is risk free.

The indicator is based on historical, simulated data and may not be a reliable indication of the future risk profile of this Sub-Fund.

The Sub-Fund has been classed as 6 because its volatility over 5 years has been measured as average and because of the extent to which the following factors apply:

Instrument risk: The Sub-Fund invests in securities that may go up or down daily for a variety of reasons including changes in interest rates, inflation expectations, perceived credit quality of the issuer, perceived value of underlying instrument or positive or adverse news.

Currency risk: As the Sub-Fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

Counterparty risk: As the Sub-Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Sub-Fund, receiving less than is due or receiving nothing.

All investment involves risk. This Sub-Fund offers no guarantee against loss or that the Sub-Fund's objective will be attained. For a more comprehensive list of Risk Factors please refer to the Offering Supplement of the Sub-Fund. The Sub-Fund uses the Absolute Value-at-Risk (VaR) approach to measure its global exposure. Please note that the Share Class risk category is not guaranteed and may change from time to time.
