Investment Objectives, Policy and Restrictions

Investment Objective

The objective of ARIA Global Dividend Value Plus Fund is to provide income with potential for capital growth primarily through investment in equity and equity related instruments. The Sub-Fund will aim to achieve annual returns of 3% over 1 Month LIBOR, and to deliver an absolute return over rolling 48 month periods. In other words, at any one time the portfolio of ARIA Global Dividend Value Plus Fund will typically be constructed with reference to an investment horizon of no greater than 48 months.

ARIA Global Dividend Value Plus Fund aims to achieve its investment objective by investing primarily in a portfolio of blue chip equities globally by pursuing the strategy detailed below. The Sub-Fund will also use derivatives to generate additional income. It is not the intention of the Fund to concentrate investments in any one geographical region or sector.

The Investment Manager shall seek to exploit a portfolio of high quality blue chip equities with above average, sustained dividend yields with additional income generated through a systematic selling of listed, liquid puts and calls on major developed market indices including the FTSE 100, Eurostoxx 50 and S&P 500.

There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time.

Investment Policy

ARIA Global Dividend Value Plus Fund will be structured principally as a portfolio of global equities with a systematic option strategy overlay.

Global equities are selected employed a systematic, quantitative stock selection process that seeks to identify blue chip companies, with a 'value' bias according to recognized 'equity valuation metrics'. The equity universe is defined by the FTSE 100, Eurostoxx 50 and SP500 equities.

Additional income is generated by a derivative overlay which describes a strategy which alternates between selling put and call options, on the S&P 500, Eurostoxx 50 and FTSE 100 Index. The Strategy consists in selling a roll of 20-Scheduled Trading Day at the money 1-month puts or calls with exposure split equally between the three indexes. The strategy alternates between selling puts or calls depending on the market conditions in order to mitigate market volatility and reduce the risk profile of the Fund.

Under normal market conditions and depending on the shorting opportunities in the markets, the Investment Manager expects that the ARIA Global Dividend Value Plus Fund's short exposure will normally be less than 10% of Net Asset Value.¹ Under normal market conditions, the Investment Manager expects that the ARIA Global Dividend Value Plus Fund's long exposure will not normally exceed 100% of Net Asset Value. Accordingly, under normal market conditions the ARIA Global Dividend Value Plus Fund's net exposure to investment markets is 100% of Net Asset Value.

The Fund will always hold sufficient liquid assets and/or positions to cover at all times any obligations arising from derivatives, including short positions.

The Fund will be investing in many of the asset classes mentioned above through the use of ETFs and will not make a direct investment in such asset class. The ETFs would be considered UCITS in their own right.

Transactions in derivatives may be used for the purposes of hedging in accordance with Efficient Portfolio Management, and in accordance with UCITS regulations. In pursuing the Sub-fund's investment objectives the Investment Manager may make use of an Exchange Traded Funds in accordance with the UCITS regulations and in accordance with its risk management policy. It is not anticipated that the use of financial derivative instruments for hedging purposes will cause the net asset value of the Sub-funds to have high volatility or otherwise cause their existing risk profile to change.

Investments in collective investments scheme will generally be EU regulated collective investment schemes. In the event that the Sub-Fund invests in Non-EU regulated collective schemes this shall be to a maximum of 10% provided such Non-EU regulated collective scheme satisfies the UCITS eligibility criteria. In the event that any investments are made in collective investment schemes with whom the Sub-Funds Directors, Investment Committee Members or Investment Manager are associated with any subscription or redemption fee with regards to investments in such schemes shall be waived. Such investments will be made through ETFs, which

¹ The Fund will be holding sufficient liquid assets to cover at all times the Sub-Fund's obligations arising from its financial derivative positions.

are UCITS eligible in their own right.

While the Investment Manager will look to ensure that the Sub-Fund invests via the investment instruments detailed above it reserves the right to alter the investment instruments utilised, in order to achieve the Sub-Fund objectives in the most effective and cost efficient manner, while always ensuring that the underlying exposure to the asset classes remains within the constraints detailed below and with all the applicable restrictions listed in the Offering Supplement and in the Offering Memorandum. For example, if open ended UCITS compliant CIS provide a more cost effective means of gaining a specific asset or market exposure, as opposed to an ETF, that CIS may be preferred. However, any such exposures will always be within the universe detailed above, and the application restrictions as detailed in this Offering Supplement and the Prospectus/Offering Memorandum.

A detailed description of the risks involved in the use of efficient portfolio management techniques and the impact that these risks might have on the performance of the Scheme are outlined in the Prospectus under the heading 'Risk Factors'.

Any changes to the Investment Policy of the Fund shall require prior notification to the MFSA as well as communication to existing investors in the Fund.

Investment and Borrowing Restrictions

In pursuing its Investment Objective and Investment Policy, the Sub-Fund will be subject to the Investment, Borrowing and Leverage Restrictions as set out in the section "Investment Objectives, Policies and Restrictions" in the Prospectus.

Use of derivative instruments

The Fund may enter into financial derivative instruments for efficient portfolio management and hedging purposes only.

Efficient portfolio management through FDIs is specifically intended for institutional brokerages and not to parties related to the Scheme. There is no hidden revenue nor are they related to the Investment Manager. The operational costs for example, include the financing costs of certain instruments which will be deducted from the revenue of the Scheme.

Method used to calculate the global exposure

The Fund uses the absolute Value-at-Risk (VaR) approach to measure its global exposure.

Leverage

The level of leverage under normal market circumstances is expected to amount to 100% of the net asset value of the Fund. Such level might be exceeded or might be subject to change in the future.

This ratio merely reflects the usage of all financial derivative instruments within the portfolio of the relevant Fund and is in this context leverage is a measure of the aggregate derivative use and is calculated as the sum of the notional exposure of the financial derivative instruments used.

For the avoidance of doubt financial derivative instruments

used to hedge a position will also form part of the calculation. Some of the instruments may actually reduce the risk within the portfolio and therefore this ratio does not necessarily indicate any increased level of risk within the Fund.

Shareholders should note that the market risk of the relevant Fund will be adequately monitored using the absolute Value-at-Risk (VaR) within the limits of relevant European and/or Maltese applicable laws and/or regulations and the Value-at-Risk (VaR) measure should be published in the audited annual report.

The absolute VaR approach calculates a Sub-Fund's VaR as a percentage of the Net Asset Value of the Sub-Fund and is measured against an absolute limit of 20%. In line with the CESR's Guidelines on Risk Measurement and the calculation of Global Exposure and Counterparty Risk for UCITS.

THE OFFERING

Share Offer

This Offering Supplement is supplemental to, and must be read in conjunction with, the Prospectus issued by the Company. The Offering Supplement constitutes an offer of Investor Shares in the Sub-Fund which is initially comprised of twelve (12) classes of Investor Shares, the Class A4, B4, C4 and D4 Shares.

The offering of the Investor Shares at the Initial Offering Price was open on the 27th June 2017 and closed on the Closing Date. The Company shall issue Investor Shares in connection with appropriately completed Subscription Applications received during the Initial Offering Period, on the Business Day following the Closing Date.

During the Offering Period, the offer will be for Investor Shares at the Offering Price applicable on the relevant Subscription Day.

Purchase, Transfer and Exchange of Shares

Investor Shares can be purchased at the prevailing Offering Price, by submission to the Company at the office of the Administrator of the relevant and properly completed Subscription Application prior to the cut off time for receipt of applications for the relevant Share Class.

Subject to the satisfaction of the requirements set out above, Investor Shares shall be issued to successful Subscribers.

Payment should be effected by bank transfer. At the Company's discretion, payments may be accepted by other means. All payments for Investor Shares must be made in the base currency of that class of Investor Shares and be received in Cleared Funds in any event before the Subscription Notice Deadline. Any applicable bank charges will be borne by the Subscriber. If the Subscription Application or associated Cleared Funds are not received as required, then the Subscription Application may be rejected or held over until the next Subscription Day at the discretion of the Company.

In the event that an application is rejected, application monies will be returned without interest by telegraphic transfer to the remitting bank at the discretion of the Company at the risk and expense of the Subscriber.

Subject to the satisfaction of the requirements set out above, Investor Shares shall be issued to successful Subscribers on the next Dealing Day. The Administrator will generally issue written confirmation of ownership to a Shareholder within five (5) Business Days after the applicable Subscription Day.

Full details of the application and subscription process appear in the Section of the Prospectus entitled "Purchase, Exchange and Transfer of Shares". A Subscription Application and other related documentation will be provided upon request by the Administrator, the Investment Manager or by an Authorised Distributor.

Redemption of Shares

Investors are directed to the Prospectus where the procedures relating to the Redemption of Investor Shares and the conditions applicable thereto are outlined.

Investor Shares can be redeemed at the prevailing Redemption Price, by submission to the Company at the office of the Administrator of the relevant and properly completed Redemption Notice before the Redemption Notice Deadline. Redemption requests received after the cut off time for receipt of redemption requests will be processed on the following Redemption Day.

In terms of the Memorandum and Articles, redemption requests and/or exchange requests are, once made, irrevocable. A Redemption Notice if accepted by the Company will be effective as at the applicable Redemption Day. Investor Shares shall be cancelled on the relevant Redemption Day and redemption requests will generally be settled within ten (10) Business Day from the relevant Redemption Day.

Full details of the redemption process appear in the Section of the Prospectus entitled “Redemption of Shares”.

A Redemption Notice and other related documentation will be provided upon request by the Administrator, the Investment Manager or by an Authorised Distributor.

- Deferral of Redemption

In line with the Offering Memorandum of the Company, in the section named “Redemption of Shares”, the Directors may in their exclusive discretion limit the total amount of redemptions effected on any Redemption Day to 10% of the outstanding Investor Shares in the Sub-Fund on that day (in each case before processing request for the issue of the Investor Shares or requests for redemptions of such Investor Shares for such Redemption Day). In such circumstances the Company or its authorised agent may scale down pro rata the number of Investor Shares to be redeemed in response to each request for redemption to the extent necessary to ensure that the foregoing limit is not exceeded, and shall carry forward the balance for redemption as at the next Redemption Day and so on to each succeeding Redemption Day until each request has been complied with in full. Requests for redemption carried forward from an earlier Redemption Day shall have priority over later requests.

Redemption Charges

Shareholders should note that there is a Redemption Penalty levied on redemptions of Class “B4” Shares which will be deducted from the redemption proceeds and calculated on the basis of the outstanding Redemption Penalty pro-rated for the percentage of the number of Shares for the Redemption in relation to the number of Shares in the original Subscription.

However, Shareholders of Class “B4” Shares may request redemption by reference to a specific monetary amount. Where this is the case, any Redemption Penalty outstanding on those Shares will be added to the redemption amount, so that the Shareholder still receives the actual amount requested (with a correspondingly greater reduction in the number of Shares held on the Shareholder's behalf) except where the redemption request represents the Shareholder's entire shareholding, the redemption amount will be reduced accordingly.

Exchange of Investor Shares

Investors are directed to the Prospectus where the procedures relating to the Transfer of Investor Shares and the conditions applicable thereto are outlined.

A holder of Investor Shares may exchange all or part of such holding (the “Original Shares”) into Investor Shares in another Sub-Fund or in a different Class of Investor Shares of the same Sub-Fund (the “New Shares”).

An irrevocable request from a Shareholder to exchange Investor Shares shall be construed as being a request for the repurchase of the stated number of Original Shares (save that the repurchase monies shall not be released to the investor) and a simultaneous request for the proceeds from such repurchase to be applied in the purchase of New Shares as may be indicated. The exchange of Investor Shares shall take place on the same Dealing Day, or as otherwise agreed with the investor, at the relevant Subscription Prices.

Irrevocable conversion instructions addressed to the Company and received at the Administrator's registered office in respect of the Sub-Fund before the cut off time for receipt of conversion instructions, if accepted by the Company, will be dealt at the Net Asset Value per Share as at the Valuation Point for the applicable Subscription Day/ Redemption Day. Requests received after this time will, unless the Company otherwise agrees, be held over until the following Subscription Day/ Redemption Day in relation to the New Shares/Original Shares. Irrevocable conversion instructions addressed to the Company and received at the Administrator's registered office on a Business Day which is not a Subscription Day/ Redemption Day in relation to the New Shares/ Original Shares, if accepted by the Company, will be carried over to the following Subscription Day/Redemption Day and dealt at the Net Asset Value per Share as at the Valuation Point for the applicable Subscription Day/ Redemption Day.

Full details of the process for the exchange of Investor Shares appears in the Section of the Prospectus entitled "Exchange of Investor Shares".

Pricing

The calculation of the NAV of the Sub-Fund and of the NAV per Share shall be effected by the Administrator as at the close of business on every Valuation Day on the basis of the closing prices on that day and in such manner as is stated in the Prospectus under the section entitled "Net Asset Value Calculation". The NAV per Share will be published on pricing platform such as Bloomberg. Further details on the pricing platform can be obtained from the Administrator.

The Performance Fee in respect of each Calculation Period will be calculated by reference to the Net Asset Value before deduction for any accrued Performance Fee. The Performance Fee will be deemed to accrue as at each Valuation Day and shall be payable monthly in arrears and normally within 14 calendar days of each Crystallisation Date.

The Performance Fee will be calculated in respect of each Calculation Period, although the first Calculation Period will be the period commencing on the Business Day immediately following the Closing Date, and ending on last Valuation Day of the first calendar week after the Fund's inception. Thereafter each Calculation Period shall commence on the Business Day immediately following the last Valuation Day of a calendar week and end on the next Valuation Day of the following calendar week.

The Company will not adopt an equalisation methodology for the calculation of the performance fee due to the Investment Manager. Shareholders may according underpay/ over pay any performance fee due to the Investment Manager when subscribing and/ or redeeming their Investor Shares.

Investors should be aware that the application of a Performance Fee may incentivise the Investment Manager of the Sub-Fund to take higher risks in its investment decision. In addition the increase in value of the NAV which is used as a basis for the calculation of performance fees, may be comprised both of realised gains as well as unrealised gains as at the end of the calculation period, and as a result, a Performance Fee may be paid on unrealised gains which may subsequently never be realised by the Sub-Fund.

Administration Fee

The Administrator is entitled to receive a fee of 0.09% per annum, payable pro rata quarterly in arrears on the last Business Day in each calendar quarter of each year. The fees are calculated by reference to the Net Asset Value on each Valuation Day. The Administrator is entitled to receive a minimum Administration Fee of €2,750 per month..

The Administrator will be reimbursed for all properly incurred and approved out-of-pocket expenses.

Custody Fee

The Company will pay the Custodian, in respect of the Sub-Fund, a Custody Fee of:

- 0.15% per annum subject to a minimum annual fee of €6,000 per annum (if the Sub-Fund's size is below EUR 25million).
- 0.10% per annum subject to a minimum annual fee of €37,500 per annum (if the Sub-Fund's size is larger than 25 million but less than 50 million).
- 0.075% per annum subject to a minimum annual fee of €50,000 per annum (if the Sub-Fund's size is larger than 50 million but less than 150 million).

The custody fee shall apply to the total net assets (not NAV) held by the sub-fund on the day the custody fee is levied; meaning the fee will be applied to the aggregate value of the assets including assets the sub-funds may hold with sub-custodians or Prime Brokers as well as deposits with third party banks (as the case may be). Dates for levying fees will be end of March, June, September and December. Custody fees are exclusive of third party fees if and when levied.

The Custodian will be reimbursed for all out-of-pocket expenses, in accordance with the Custody Agreement. A sub-custody fee may be charged in respect of any appointed sub-custodian.

Authorised Distributor Fees

Class B4 is only available to existing clients of ARIA's discretionary service invested via the ARIA Investment Platform whose investments are held in custody through SEI Global Nominees.

Class B4 is available to those existing clients of ARIA whose investments are held in custody with ARIA through SEI Global Nominees being the current custodian. Class B4 is not and will not be available to any other custodian or execution venues. Class B4 Shares will be denominated in the base currency of the respective Sub-Funds.

Class B4 Shares are not subject to an "upfront" Subscription Fee (i.e. a Subscription Fee that reduces a Shareholder's initial subscription amount to the Sub-Fund) but are subject to an Authorised Distributor Fee and a Redemption Penalty levied upon the redemption of Class "B4" Shares made within their Redemption Penalty Period. The Redemption Fee is applied in connection to the repayment of any unamortised balance of the 'Authorised Distribution Fee'

Upon the subscription for Class B4 shares from the Shareholder, the Investment Manager shall receive an Authorised Distribution Fee of up to 7.0% of the Net Asset Value attributable to the subscription. This percentage establishes a fixed monetary amount specific to each Investor which is then expensed against the Sub-Funds assets attributable to that specific Investor. This Authorised Distribution Fee shall be amortised over a maximum 84 month period (a 12 month period for each 1% of Authorised Distribution Fee levied) against the assets of the Sub-Fund attributable to the individual Shareholder. Should the investor redeem prior to the lapse of the Redemption Penalty Period, the investor will incur the redemption penalty fee which will be levied as described below in the event of a specific Investor's redemption.

The amount of the Authorised Distribution Fee is paid by the Company to the Investment Manager for the benefit of the Authorised Distributor in the calendar month following the time of subscription for Class B4 Shares.

The amortisation period is determined by the percentage of the Authorised Distributor Fee agreed between the Shareholder and the Authorised Distributor.

The Authorised Distribution Fee shall be amortised over a period of time, (a 12 month period for each 1% of Authorised Distribution Fee levied), against the assets of the Sub-Fund attributable to the Shareholder and if the investor redeems prior to a certain period of time, such investor would need to pay a Redemption Penalty, which is equal to outstanding amount not yet amortised. By way of example, a 7% Authorised Distribution Fee will mean an 84 month amortisation period or Redemption Penalty Period, and 5% would mean a 60 month amortisation period or Redemption Penalty Period. The Authorised Distribution Fee will always be calculated on the Investor's original Subscription value, and the current value of the investor's units held thereafter will not have any bearing on this calculation.

The Redemption Penalty will decline to 0% having been fully amortised over the Redemption Penalty Period.

Example: Subscription of EUR 100,000 at first Subscription Date in February 2012 for 80,000 Shares

Authorised Distribution Fee: 5% EUR 5,000

Redemption Penalty Period: 5 years = 60 months

Monthly amortisation = 5000 EUR / 60 = 83.34* Euros per month

Redemption: 45,000 Shares on 15 February 2016

Amount of charge already paid by monthly amortisation (first Subscription day February 2012 – first Subscription/Redemption Day February 2016):

Redemption Penalty Period elapsed at Redemption Day: 48 months

Remaining Redemption Penalty Period: 60 months – 48 months = 12 months

Remaining charge to be deducted from redemption 12 months at 80.34* Euros = 1000.08 EUR

The above amount of 1000.08 EUR needs to be pro-rated to reflect for the number of shares being redeemed being less than the Initial Subscription.

$1000.08^* \text{ EUR} \times 45000 \text{ Shares} / 80000 \text{ Shares} = 562.55^* \text{ EUR}$

The above amount of 562.55 EUR will be deducted from the proceeds relating to the redemption of 45,000 Shares as at the Redemption Date in EUR (subject to rounding).

At the end of the month following the completion of the amortisation period relating to the original Subscription, once the Authorised Distribution Fee is repaid in full to the Sub Fund, the Shareholder's remaining shareholding will be automatically converted to an alternative Share Class which does not support Authorised Distributor Fees, nor feature any redemption penalties, to ensure that the Shareholder does not continue to bear the cost of any unamortised Authorised Distribution Fee relating to Shareholdings of other Subscriptions.

Depending on when a Shareholder invests or redeems out of the Sub-Fund potential inequalities may arise. In the event that such inequalities occur, neither the Company, the Investment Manager, Administrator or Custodian shall be liable to any Shareholder for any inequalities or excess Redemption Penalty so levied.

Subscribers to Class B4 should note that the effect of the Authorised Distribution Fee will be reflected by having higher expenses attributable to the Sub-Fund's assets which will also reflect in a decreased Net Asset Value of Class B4 and those investors being charged a higher Authorised Distribution Fee shall also negatively affect the Net Asset Value.

Below please find the fee structure with the respective charges for every year lapsed

The charge shall be to the benefit of the Fund. No Early Redemption Fee is applicable for redemptions which take place after this period.

The Sub-Fund for Share Classes A4, C4 and D4 only, may impose a Subscription Fee on the issue of Shares of up to 5% of the Net Asset Value per Share subscribed by each investor, to be paid out of the subscription monies at subscription and payable to the Investment Manager. The Subscription fee will only be charged to Class A4, C4 and D4 investor shares if such subscription is done through an Authorised Distributor.

The Investment Manager may pay all or part of the fees and charges it receives as a commission, retrocession, rebate or discount to financial intermediaries, Authorised Distributors or other investors. The Subscription Fee may be reduced or waived at the discretion of the Directors or Investment Manager.

Preliminary Expenses

The Sub-Fund is responsible for paying the preliminary expenses of and incidental to, the initial offering. This includes a share of the expenses relating to the establishment of the Company in Malta as well as its own initial organisational expenses (including the negotiation and preparation of the contracts to which it is a party, the costs of printing this Offering Supplement, the fees and expenses of its professional advisers and certain marketing expenses in connection with the launch and initial promotion of the Fund, and in connection with the offering, issue and listing of the shares).

These preliminary expenses are estimated not to exceed GBP 30,000 and they will be amortised on a straight line basis over the first 60 months of the Sub-Fund's operations.

Other Expenses

The Sub-Fund will also be subject to other fees including, its pro-rata share of the Directors and Company Secretary Fees and its Operating Expenses as set out in the Prospectus.

The Investment Manager may also be paid a Promoter's Fee, which at its absolute discretion can be paid to certain promoters for their assistance in distributing the shares of the Sub Fund. The Promoter's Fee is paid in respect of parties appointed by the Investment Manager to provide a range of services, including but not limited to marketing, asset raising and distribution support, including the disbursement of distribution fees. The Promoter's fee shall be paid from the assets of in relation to that Sub-Fund and shall be amortised over the period of five (5) years. Any such fee paid from the assets of the Sub Fund will not exceed 0.20% of the Net Asset Value per annum on the value of each subscription.

RISK FACTORS

Investors should refer to the section entitled “Risk Factors” in the Prospectus for information on the risks associated with making an investment in this Sub-Fund.

It cannot be guaranteed that the applicable sector will continue to rise in the future. It is also possible that the Sub-Fund may not be able to identify sufficient high-quality investment opportunities. The value of the consumer sector may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Political unrest, acts of war, terrorism, internal or external tensions and any future actions of governments in any country could each affect the value of consumer goods.

Whilst the Investment Manager will ascertain that all the necessary measures are taken, like in all investments a risk does exist that the fund does not achieve its investment objectives.

Fund Specific Risk Factors

ETFs

The Sub-Fund may invest some or all of its assets in UCITS authorised according to the UCITS Directive or collective investment undertakings within the meaning of Article 50(1) of the UCITS Directive. The price and movement of an ETF designed to track an index may not track the underlying index and may result in a loss. In addition, ETFs traded on an exchange may trade at a price below their net asset value (i.e. at a discount).

The Sub-Fund may invest in ETFs which are leveraged, inverse or inverse-leveraged ETFs. ETFs that seek to provide investment results that are the inverse (or inverse-leveraged, meaning the ETF attempts to provide multiple of the inverse) of the performance of an underlying index are subject to the risk that the performance of such ETF will fall as the performance of the ETF’s benchmark rises – a result that is the opposite for traditional investment funds.

In addition, the ETFs held by the Sub-Fund may utilize leverage (i.e. borrowing) to acquire their underlying portfolio investments. The use of leverage involves special risks and an ETF that utilises leverage may be more volatile than an ETF that does not because leverage tends to exaggerate any effect on the value of the portfolio securities. Because leveraged, inverse or inverse-leveraged ETFs typically seek to obtain their objective on a daily basis, holding such ETFs for longer than a day will produce the result of the ETF’s return for each day compounded over the period, which usually will differ from the actual multiple (or inverse) of the return of the ETF’s index for the period (particularly when the benchmark index experiences large ups and downs).

Risks in relation to Equity Securities

The Sub-Fund will not be investing in Equity Securities directly. The Sub-Fund will through ETFs exposure to Equity Securities Risks. The price of equity securities may rise or fall because of changes in the broad market or changes in a company’s financial condition, sometimes rapidly or unpredictably. These price movements may result from factors affecting individual companies, sectors or industries selected for a Sub-Fund’s portfolio or the securities market as a whole, such as changes in economic or political conditions. When the value of a Sub-Fund’s securities goes down, your investment in the Sub-Fund decreases in value. Equity securities generally have greater price volatility than fixed income securities.

Currency Trading Risks

The Sub-Fund will not be investing in Currency Trading directly. The Sub-Fund will through ETFs have exposure to Currency Trading Risks. Since the instruments held by the Sub-Fund may be denominated in currencies different from its reference currency, the Sub-Fund may be affected unfavourably by exchange

control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of Shares in the Sub-Fund.
