RISK AND REWARD PROFILE

This indicator shows how much a Sub-Fund may have risen and fallen in the past and therefore how much a Sub-Fund's returns may have varied. It is a measure of a Sub-Fund's volatility. The higher a Sub-Fund's past volatility, the higher the number on the scale and the greater the risk that investors in this Sub-Fund may have made losses as well as gains. The lowest number on the scale does not mean the Sub-Fund is risk free.

The indicator is based on historical, simulated data and may not be a reliable indication of the future risk profile of this Sub-Fund.

¹ Any cash deposited in a Bank or Credit Institution will be notified to the Custodian who would oversee the safe-keeping of such deposits.

² The Fund will be investing in the asset classes mentioned above through the use of ETFs and will not make a direct investment in such asset class. Wherever possible, the ETFs would be considered UCITS in their own right. As a result of restrictions imposed by the UCITS Directive, a UCITS Scheme cannot have a direct investment in commodities or precious metals. The UCITS Directive however does allow the use of Exchange Traded Commodities to gain an exposure to commodities or precious metals. The Fund may from time to time invest in Exchange Traded Commodities which are deemed to be eligible under the UCITS Directive.

The Sub-Fund has been classed as 4 because its volatility over 5 years has been measured as average and because of the extent to which the following factors apply:

Instrument risk: The Sub-Fund invests in securities that may go up or down daily for a variety of reasons including changes in interest rates, inflation expectations, perceived credit quality of the issuer, perceived value of underlying instrument or positive or adverse news.

Currency risk: As the Sub-Fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

Counterparty risk: As the Sub-Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Sub-Fund, receiving less than is due or receiving nothing.

All investment involves risk. This Sub-Fund offers no guarantee against loss or that the Sub-Fund's objective will be attained. For a more comprehensive list of Risk Factors please refer to the Offering Supplement of the Sub-Fund. The Sub-Fund uses the Absolute Value-at-Risk (VaR) approach to measure its global exposure. Please note that the Share Class risk category is not guaranteed and may change from time to time.
