

PARALA BALANCED MACRO MULTI-ASSET FUND

A sub-Fund of the ARIA SICAV PLC

Fund
Focus

What are the Parala Macro Multi-Asset (MMA) Funds?

The MMA family of funds comprise of 3 risk-rated multi-asset UCITS 5 funds. Drawing on a sophisticated asset allocation model, the Funds are dynamically managed using ETFs (providing exposure to equities, bonds and commodities amongst others), to gain the most efficient exposure to the most appropriate asset classes at any given point in the cycle.

Who should consider investing?

Any investor seeking:

- a multi-asset approach to investing
- an actively managed portfolio tailored to a given risk profile
- an approach that uses low cost ETF's to gain efficient and dynamic exposure to a diversified portfolio of assets
- a strategic approach towards asset allocation that draws on research from world renowned academics
- a dynamic approach to asset allocation that anticipates asset performance for a given economic outlook
- a ready made risk-rated portfolio which accepts regular savings

Academic Alpha

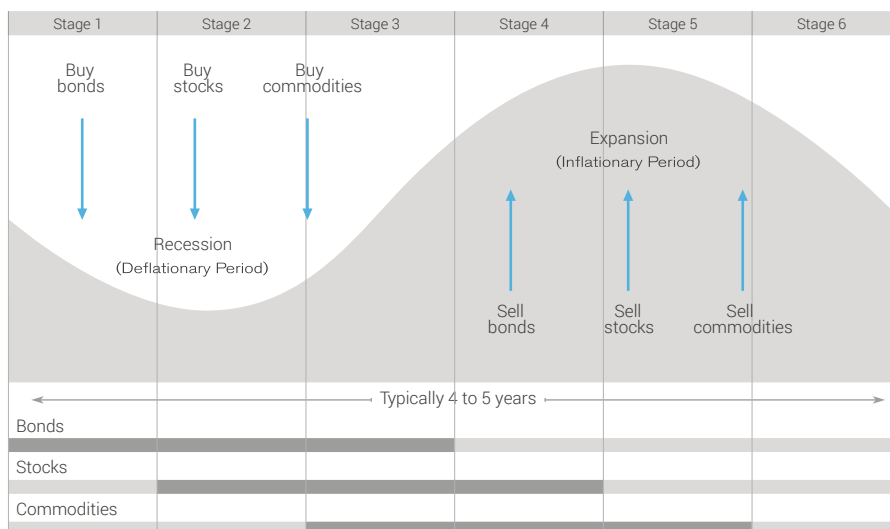

Perhaps unsurprisingly, academic evidence shows that outperformance comes by being invested in the right asset classes, at the right time in the economic cycle. Built on extensive academic research, the Parala model is able to model the evolving relationship between asset performance and economic variables in order to determine the assets most likely to outperform in any economic environment. Parala's sophisticated portfolio construction approach, ensures that the Fund's investors are consistently exposed to a portfolio mix expected to outperform in a range of economic outcomes.

Key Characteristics of the Parala Macro Multi-Asset Funds

Understanding Macro-Cycles

- Macro-economic cycles significantly influence asset prices
- Macro-economic indicators such as interest rates, credit spreads, inflation and money supply are used to identify and measure changing economic conditions
- These indicators show significant but time varying correlations with asset prices
- The Parala model identifies the most appropriate portfolio of assets for the current stage of the economic cycle

Stages of the Economic Cycle

Investing Rational for Adding Parala Balanced Macro Multi-Asset Fund to your Portfolio

- **Global Diversification:** means gaining exposure to a globally diverse mix of asset classes in order to generate returns commensurate with the level of risk
- **Consistency in Process:** investing is an emotional business, and therefore the approach relies on an objective, academically verified, disciplined and consistent approach to investing
- **Dynamic Risk Management:** as economic conditions change, so does the asset mix within the Fund
- **Active + Passive:** actively managed asset allocations are updated monthly, whilst using ETFs to minimise costs

Past correlations are not indicative of future correlations, which may vary. The portfolio risk management process includes an effort to monitor and manage risk, but does not imply low risk. Diversification does not protect an investor from market risk and does not ensure a profit.

FOR PROFESSIONAL INVESTORS ONLY – NOT FOR DISTRIBUTION TO THE GENERAL PUBLIC.

Risks

Please carefully consider the below risks in addition to the more detailed description in the Prospectus and Offering Supplement entitled "Risk Factors".

- **Market risk:** The value of assets in the Macro Multi-Asset Funds (MMA) are typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk:** Material losses to the MMA Funds may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk:** The MMA Funds may not always find another party willing to purchase an asset that they want to sell which could impact their ability to meet redemption requests on demand.
- **Exchange rate risk:** Changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. If applicable, investment techniques used to attempt to reduce the risk of currency movements (hedging), may not be effective. Hedging also involves additional risks associated with derivatives.
- **Custodian risk:** Insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the MMA Funds' assets can result in loss to the MMA Funds.
- **Derivatives risk:** Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk:** A party that the MMA Funds transact with may fail to meet its obligations which could cause losses.
- **Emerging markets risk:** Emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Volatility risk:** An investment in the MMA Funds can expose investors to higher volatility levels than is normally associated with "balanced" investment strategies, therefore the value of their investment may be subject to significant changes in the short term.
- **Leverage risk:** The Funds may operate with leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. A leveraged portfolio may result in large fluctuations in the value of the Fund and therefore entails a high degree of risk including the risk that losses may be substantial.
- **Historical performance data:** The composition of each strategy is determined by reference to historical data. However, past performance is not an indicator of future performance. The performance of a market may differ to that indicated by a mathematical formula based on historical data, which in turn may adversely affect the value of your investment.

Fund Manager

ARIA Capital Management

We are a rapidly growing asset management firm headquartered in London, the original team opening the City office in 2007. We are active fund managers focussed on delivering alpha through a variety of systematic approaches, and currently manage, advise and administer, through ARIA and its affiliates over US\$1bn* of assets. These materials describe certain strategies that can be implemented through a variety of investment products. Any duties owed to an investor by ARIA and/or any of its affiliates with respect to products based on the strategies described herein will vary depending on nature of the product involved, the terms of the relevant agreements between the parties, the identity of the parties, the applicable legal and regulatory regime and other factors. This document has been issued by Absolute Return Investment Advisers (ARIA) Limited, regulated by the Financial Conduct Authority. This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the fund and does not constitute an offer to buy shares in the fund. Prior to an investment, prospective investors should carefully read the latest Key Investor Information Document (KIID) as well as the offering documentation, including but not limited to the fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KIID and latest annual/semi-annual report are available free of charge from the fund's paying and information agent and/or from your financial adviser. Shares of the fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations. Financial advisers generally suggest a diversified portfolio of investments. The Funds described herein does not represent a diversified investment by itself. An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them.

Confidentiality: No part of this material may, without ARIA's prior written consent, be (i) copied, photocopied or duplicated in any form, by any means, or (ii) distributed to any person that is not an employee, officer, director, or authorized agent of the recipient. ©2016 ARIA.
