RISK AND REWARD PROFILE

Lower Risk

Typically lower rewards

Higher Risk

Typically higher rewards

- The indicator is based on historical, simulated data and may not be a reliable indication of the future risk profile of this Sub-Fund.
- The Sub-Fund has been classed as 4 because its volatility over 5 years has been measured as average and because of the extent to which the below factors apply.

Risk factors

- **Instrument risk:** The Sub-Fund invests in securities that may go up or down daily for a variety of reasons including changes in interest rates, inflation expectations, perceived credit quality of the issuer, perceived value of underlying instrument or positive or adverse news.
- **Currency risk:** As the Sub-Fund invests in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

The risk and reward indicator

- This indicator shows how much a Sub-Fund may have risen or fallen in the past and therefore how much a Sub-Fund's returns may have varied. It is a measure of a Sub-Fund's volatility. The higher a Sub-Fund's past volatility, the higher the number on the scale and the greater the risk that investors in that Sub-Fund may have made losses as well as gains. The lowest number on the scale does not mean the Sub-Fund is risk-free.

- **Counterparty risk:** As the Sub-Fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Sub-Fund, receiving less than is due or receiving nothing.

All investment involves risk. This Sub-Fund offers no guarantee against loss or that the Sub-Fund's objective will be attained.
